

## Enhanced On-Campus Medical Care for Resurrection Catholic School Students

Resurrection Catholic School will offer medical care to our students from the pediatricians of Nemours Children's Health System. Nemours CareConnect is a high-quality online interactive video visit program that will enable Nemours physicians to help assess students and determine safe and necessary care.

Parents will be contacted by the school prior to a visit. Parents or guardians are welcome to join the virtual visit, and an electronic summary of the visit will be available via MyNemours, an electronic health record portal. Following the visit, parents will receive an email with a link to access MyNemours. If we have your child's doctor's contact information, a copy will also be sent to the child's doctor. If a prescription is necessary, the order will be sent electronically to your pharmacy of choice for parent pickup.

We encourage your student to have access to this service for illnesses, injuries, chronic disease management, etc., during school hours. Please review and complete the enclosed forms, and return them to Resurrection Catholic School immediately. Your child will not be able to access care without completed forms. The signed forms will cover all visits that may occur for the 2017-2018 school year.

- Student and Family Information Form (complete & return)
- Telemedicine Consultation Consent and Authorization for Release of Information (sign and return)
- Patient Presents for Appointment Without Legal Representative Authorization for Treatment (sign and return)
- Notice of Privacy Practices (for informational purposes)
- Financial Responsibility & Assignment of Benefits (sign and return)

Your child's insurance will be sent a claim for services provided, and an invoice of \$49 will be sent to the parent/guardian if insurance does not cover. The visit is fully private and HIPAA-compliant.

If you have questions about the forms needed, please contact principal, Mrs. Schwope, at (863) 644-3931.
